

voneus

taking you further

Voneus are looking to bring high speed broadband to your community

Dear Resident,

Members of your community recently contacted Voneus looking for a better broadband solution.

We are now exploring the possibility of providing an alternative broadband solution to the slow copper wire infrastructure that is currently in place - but before we do anything, we need to know that this is something you want.

Here's what you need to know about Voneus:

- Voneus offer a fixed wireless solution that delivers average speeds of 50mbs (both upload and download).
- This system is completely independent of your existing BT or ADSL line - so you do not need to keep your current BT landline in order to receive our broadband service.
- Voneus also offer an optional VoIP landline service, that allows you to keep your existing number and could be used to replace your current landline.
- Data packages include: **Freedom**: Unlimited* for £34.99/ month; **Essential**: 20gb for £20/ month.
- Installation costs start at £150** - this may vary depending on the complexity of your property– you will be advised of any and all costs before we go ahead.

If you would like to know more, please send your name, full postal address and contact number to sales@voneus.com to register your interest with no obligation.

BUT if you do not let us know, it will not happen!

I look forward to hearing from you and (potentially) bringing you better broadband.

Yours sincerely,

Olivia Gray
Consumer Sales Manager
